Abstract of JP6087953

PURPOSE: To provide a saturated polyester elastomer composition excellent in heat resistance, thermally not deteriorated in a process for producing strands after the production of the saturated polyester elastomer, and useful as a molding material. **CONSTITUTION:** The saturated polyester elastomer produced by reacting an aromatic dicarboxylic acid, an alkylene glycol and a poly (alkyleneoxide) glycol is treated with the aqueous solution of an orthophosphoric acid salt and/or a polyphosphoric acid salt.
